CSE 4321  
Software Testing and Maintenance  
Submitted 2/13/2022

## Task 1:

Below are screenshots of the project setup and running.

## Task 2:

The following steps are followed to run the lightlib-lms project:

1. Run Docker in the command line using `docker-compose up`
2. Open the project in Visual Studio 2022 and run `Library.Web`
3. Open a web browser and enter `localhost:8000` in the address bar to navigate to the Library LMS page.

## Task 3:
